

## ☺THE TUDOR COIN ☺

On Tuesday Olivia and Lucy were going on a school trip to Weston beach. They were going to play and learn how to make sand castles like the professionals. Once they got there they started to play.

Olivia and Lucy were walking along the sand when they found a coin. It was a very old coin it had a picture of Henry the VIII on it. Olivia said "it must be a Tudor coin." They both touched it and the world started to spin.

After they finished transporting they both felt very dizzy. All they could smell was unfresh air, they could see is lots of different clothes. Lucy said "we are in the Tudor times." Then they saw Henry the VIII in the distance. He was very fat and wearing a big blue coat and a very feathery hat.

He came over and said "you are going to be beheaded because you don't live here" so Henry took them off to be beheaded but just in the nick of time they touched the coin and they were back on the beach. And they were just in time to make the sand castles.
